THE 5 STEP SOLAR PROCESS

SOLAR ANALYSIS

We used state of the art technology to determine exactly how many Sun-Hours your home needs to give you the maximum amount of savings!

PERMITTING

This is the longest part of your Journey! We are working diligently to get your city permits approved and Home Owners Association approval as applicable. This Process generally takes 4-8 weeks

INSTALLATION

We make installation a breeze! As soon as all permits and required documents are approved we will call to set you up with a convenient date and time to begin your Solar Install.. Installation times vary depending on the size of your system, steepness of your roof and weather. Your project manager will give you a timeline when coordinating your installation.

ACTIVATION

The Final step is waiting for your "Permission to Operate." We will be working hand in hand with your power provider to expedite this process. You will receive an email from our team and the power company when this step has been completed, allowing you to turn your system on and GO SOLAR!

RELAX

After your system has been turned on, you can sit back and relax knowing that you are helping the planet and your wallet by investing in renewable energy.

THE BENEFITS OF GOING SOLAR

By going Solar you are reducing your dependence on the power company. Replacing a rent like payment that never goes away and consistently increases with a Solar Bill that is fixed and puts money back in your pocket!

Federal Tax Credit

Receive a 30% Tax Credit off the total cost of your System!*

Home Equity!

On average homes with Solar will sell for 4 to 6% more than homes without Solar.

Security

You are protected from economic factors which result in increased utility costs. You will never pay more for your solar electricity, no matter what!

SREC Payments

Get paid for your production! Every time your system generates 1,000 Kwh you will earn 1 SREC certificate which pays you via direct deposit to your bank!

Timeline to Independence

By going Solar there is an end date to how long you pay for electricity. After your panels are paid for you are now an independent energy producer!

*please get in touch with a financial expert to determine tax liability and benefits

COST OF SOLAR:

Fixed Rate

Solar costs will never increase. You will know exactly what you will be paying every single month and protect yourself from increasing utility rates.

Rising Costs and Fees

Local utilities raise their costs 4% a year on average. This means that even if you use the exact same amount of power you will continue to pay more every single year. Your bill also includes unnecessary fees which makes it even higher!

HOW NET METERING WORKS

① Solar panels absorb energy from the sun

② The inverter converts the energy from the sun (DC) to AC electricity to use

The energy is used in your home, school or office

③ Bi-directional utility meter measures energy used, and excess energy produced

④ Smart meter billing will allow you to track your grid imports and exports! This makes you the new authority on your electricity usage!

⑤ You will receive a 1 to 1 credit on the power you send back to the grid which will reduce or even eliminate your Dominion bill completely!

WARRANTIES AND CLAIM PROCEDURES

Industry Leading Warranties

Your Solar system comes with an Industry leading 25 year workmanship warranty, which means you will not be charged for labor, parts or materials if we need to service your system. Your panels also come with a 25 year production gurantee, which means you can have peace of mind knowing your system will provide you with energy independance for the long-term.

Submitting a Claim

In the rare event you need to submit a claim simply reach out to your solar sales representative, account manager or by emailing us at Support@mynoblesolar.com

Timeline for Resolutions

Noble Solar does everything in its power to expedite all claim procedures. Based on the scope of the claim your account manager will give you a timelime and timely updates on when you can expect resolution
